

# DISASTER PREPAREDNESS SEMINAR

The DPS is a one-day course designed to equip individuals and local churches to be better prepared and ready to mobilize within their own community in response to a disaster.

We want to give you the physical, emotional and spiritual tools so that you aren't just taking care of you - but are ready and able to make a profound impact on your community during their time of greatest need.

## DPS COURSE CONTENT

### Personal Preparedness

Shelter in place for 72 hours so you can take care of your family and then be in a position to help your neighbors.

### Church Preparedness

Meet the needs of your staff and congregation in order to be uniquely positioned to serve and minister to the community during times of crisis. Develop a plan of action to reach out by providing food, supplies, shelter or volunteer teams to assist your community.

### Community Intergration Preparedness

Learn how to connect with local emergency personnel and build relationships with those in authority so that when crisis comes, you and your church can be a resource and support to community leaders.
